Summary

I am a very inquisitive and disciplined web developer, during my 11 years in various martial arts I learned that I will never know everything, so I am excited to learn anything! From something as large as a different way somebody approaches their coding process to something as small as a nuanced edge case. I take pride in how hard I work and I love creating tools to make other people's lives easier.

Projects

Restaurants Around the World: https://restaurants-atw.herokuapp.com
GitHub: https://github.com/sgemberling117/restaurants
- Role: Full-Stack Developer (solo project)
- Developed a full stack application where users can search for and save their favorite restaurants from anywhere in the world
- Utilized MERN Stack (MongoDB/mongoose, Express, React, Node), CSS, JWT Authentication, Git/GitHub, Heroku, Google Places API

Cinque: http://cinque.cinquewd.com/
GitHub: https://github.com/Cinque-Web-Development/cinque
- Role: Front end developer (team project)
- Integrated multiple APIs into a single web page
- Utilized: React, CSS, Calendarific API, SportsDB API, DataNews API, Open Weather Map API, NASA APOD API, Twitter API, Reddit API, Netlify, Progressive Web App (PWA), Git and GitHub

JWT Auth Template with MySQL: https://jwt-template-mysql.herokuapp.com
GitHub: https://github.com/sgemberling117/jwt-auth-template-with-mysql
- Role: Full-Stack Developer (solo project)
- Created template for people wanting to start a MySQL React project without worrying about the authentication
- Utilized SERN Stack (SQL/MySQL, Express, React, Node), CSS, JWT Authentication, Git/GitHub, Heroku, ClearDB(for deployment)

Technical Skills

Proficient: HTML, CSS, JavaScript, Node, Express, mongoose, MySQL, PostgreSQL, React, Mac Command Line, Responsive Web Design, OAuth, Agile, Heroku, REST APIs, Relational Databases, Document-Based Databases, Postman, JSON, jQuery, Git/GitHub, AJAX
Experienced: C++, C#, Python, Django, Gatsby, Sass, Netlify, Materialize, BootStrap, graphQL, Markdown

Experience

Dialexa, Dallas, TX - Software Engineer   September 2021 - Present
-

Cinque Web Development, Dallas, TX - Full-Stack Developer   August 2020 - September 2021
- Develops applications with a distributed team to meet clients' business needs and personal goals
- Responsible for primarily back end development, working in React, Node, and JavaScript

General Assembly, Dallas, TX - Teaching Assistant   August 2020 - September 2021
- Assisted students with homework and taught them skills to analyze problems and arrive at solutions
- Inspire and support students as they identify their passions and drive their own continued learning beyond the curriculum

Education

Certificate in Software Engineering - General Assembly, Dallas, TX   April 2020 - July 2020
